 - **Backend:** NodeJS, ExpressJS, Firebase, RESTful APIs, CI/CD pipelines
 - **Testing:** Unit testing with Vitest/Jest, CI/CD integration
 - **Other Tools :** Figma, Git, GitLab, Github, Docker, SonarQube
-

Work Experience

Full Stack Developer | Layer8 - Cybersecurity Company Aug 2022 – Present

- Lead developer for our component library, working closely with the entire team to keep communication clear and our goals aligned. This collaboration helped reduce development time by 50% by creating reusable, scalable, secure, and responsive components.
- Leading the development of a cloud management platform to bring all our services together. I built features for user and service management using RESTful APIs, making it easier for our team and customers to manage our tools.
- Played a key role in the redesign and reorganization of our projects. By updating our design standards and leveraging our component library, I helped us achieve 100% consistency across all our projects.
- Offered advice on best practices for web application security to reduce vulnerabilities and enhance system stability.

Full Stack Developer & UX/UI Designer | Freelancer Dez 2021 – Present

- Designed and built websites focused on responsive design and performance optimization to help clients boost their online presence.
- Achieved absolute client satisfaction through cohesive and polished results. Produced creative solutions with graphic design and multimedia projects and met the client's needs 100%.

Frontend Developer | Gestix - Invoice Company Jan 2021 – Nov 2021

- Redesigned and rebuilt the company's main website, making it faster and more user-friendly, which improved overall performance by 35%.
- Developed a customizable, UI/UX-friendly website template for clients, increasing customer satisfaction by 40%.
- Revamped the back-office interface to make it easier to use, improving overall usability for our internal team.

Projects

Personal Portfolio | fabiof.dev

- Designed and developed a modern, responsive personal portfolio using Next.js 15 (React 19).
- Created wireframes and prototypes with Figma.
- Developed a custom npm package for spyscroll functionality, filling a gap for React 19.
- Integrated Lottie animations to enhance user engagement.

Business Website | Freelance Project - resultadodemestre.pt

- Developed a dynamic business website using HTML, CSS, JavaScript, and PHP.
- Integrated WordPress to allow the client to manage product listings easily.
- Focused on a clean, user-friendly design to effectively showcase available products.

Social Media App | fabiof.dev/facepalm

- Designed and built a social media app using React Native and Firebase.
 - Implemented user authentication, enabling secure login and registration.
 - Enabled core features such as post creation, commenting, friend connections, and real-time private messaging for seamless user interaction.
-
